Mechanisms of Action of DBS

Wednesday October 22, 2008
1:00 PM to 2:00 PM

Location: New York State Psychiatric Institute, 1051 Riverside Drive, Rm. 6601 (Board Room)
(Enter Kolb Annex, 40 Haven Ave., turn rt., walk though atrium, across bridge over Riverside Dr. to new NYSPI, walk south along main corridor)
(See over for speaker brief biographies and publications)
About Sarah H. Lisanby, M.D.
Dr. Sarah H. Lisanby is Professor of Clinical Psychiatry, at Columbia University. In addition, she is Director of the Division of Brain Stimulation and Therapeutic Modulation at the New York State Psychiatric Institute, head of the Transcranial Magnetic Stimulation (TMS) Unit in the fMRI Research Center at Columbia, and the New York Presbyterian Hospital Brain Stimulation Service. She is also Director of the Brain Behavior Clinic at NYSPI. She is a national and international leader in the emerging field of brain stimulation research and therapeutics. Dr. Lisanby has authored or coauthored over 150 articles, abstracts, chapters, books, reviews and editorials concerning TMS, electroconvulsive therapy (ECT), depression, and related topics. For her biography, go to http://www.brainstimulation.columbia.edu/staff/bio_lisanby.html and http://asp.cumc.columbia.edu/facdb/profile_list.asp?uni=shl24&DepAffil=Psychiatry

About Salomão (Solomon) Segal, M.D.
Dr. Salomao Segal is a Paul Janssen Fellow in Translational Neuroscience at Columbia University under the mentorship of Drs. Sarah H. Lisanby, Ramin V. Parsey and Holly Moore. Dr. Segal received postdoctoral research training in Geriatric Neuropsychiatry at Columbia University Department of Psychiatry, under Dr Holly Moore’s mentorship. With backgrounds in neurosurgery, neuroanatomy and neuroimaging, Dr. Segal’s research work focuses on the study of mechanisms of action of deep brain stimulation and its optimization for the treatment of major depression disorder and other neuropsychiatric illnesses.
